

WHEN YOU LEAVE

A utilization review/case manager (“discharge planner”) will daily evaluate your insurance status for your hospital stay and inform you and the physician of any difficulties with coverage. Occasionally, a patient may need to be transferred to the Skilled Nursing Unit for extended care. You will be given instructions on scheduling a follow up appointment to see Dr. Shadeed at his office at the time of your discharge.

If your condition requires continuing medication at home, your doctor may give prescriptions to be filled at your pharmacy after being discharged. Be sure to ask your physician to give you the prescriptions.
